## GEHWOL med Callus Cream

### Effective ingredients

Avocado oil, sea buckthorn oil, urea, glycerin, algae extracts, allantoin, farnesol.

### Application

Apply cream to the affected skin areas twice daily. Do not apply to sensitive or injured skin. Do not bring into contact with eyes and mucous membranes. Regular skin care with GEHWOL med Lipidro Cream is recommended to protect against new formation of excess callus.

### Effects of product

GEHWOL med Callus Cream removes annoying callus within 28 days. Urea, fortified with glycerin and allantoin, loosens the cell bonds of the hard callus layers. This intensive care immediately softens and noticeably reduces callus within a few days. Normal conditions are generally attained within 28 days.\* Lipids strengthen and protect; silk extract provides moisture and smoothes the skin.

**Also suitable for diabetics**

**Dermatologically tested**
